Re: Certification of HVAC Owner Training

Northern Wolves Inc. hereby confirms that on Monday, August 31, 2026, we provided on-site operation and maintenance training to the Saddle River Day School maintenance team on the HVAC equipment installed under our subcontract. The training consisted of a walkthrough of the building and roof, with a review at each equipment type.

Topics Covered

- **Maintenance points:** filters, screens and strainers that must be changed or monitored, and recommended service intervals.
- **Critical valves and shutoffs:** location and operation of isolation valves, control valves and make-up water.
- **Emergency shutdown:** boiler emergency shutoff, equipment disconnects and kill switches.
- **Troubleshooting:** reading unit alarms and trouble codes, basic checks, and who to contact for service.

Equipment Covered

- **Boiler room:** condensing boilers, pumps and VFDs, emergency shutoffs, valving, make-up water, chemical feeder, strainers, air separator and expansion tank.
- **Rooftop units (RTUs):** filters, valving, trouble codes, ductwork and dampers.
- **Split systems:** indoor units and rooftop condensing units.
- **VAV boxes:** hot water reheat coils and valving.
- **Cabinet and electric unit heaters (CUH/EUH):** maintenance and valving.
- **Fin tube radiation and radiant ceiling panels:** maintenance and valving.
- **Exhaust fans:** lab hood exhaust fans and toilet exhaust fans.
- **Destratification fans.**

Building Management System (BMS) training was provided separately by AME, Inc., the controls subcontractor, in accordance with Section 23 09 23.

Sincerely,

Andrei Kastanyan,
